My Dear CCCN Siena Reception Staff And The Radiation Team:
Pat, Karen and Company, Dr. Schwartz, Dr. Anderson, Dr. Van Tuyl, Helen, James, Kim, Margaret, Lori, Richelle, Fabiola and Sandi

Thank you for all the small and great things you do for us survivors. Is that what I call myself now? LOL! When my Doctor told me it was a Happy Diagnosis: very, very slow growing histologically, and I have 15 or more years, gee, it felt too long! I wanted to be seriously cheerful. But I felt free! And angry. Not because it's I the victim, but because of all the nuisance of Medicine. Especially the radiation part. I hated showering in precise hours. I struggled with the new variable in my medical regimen, so it created problems with my already difficult BP. It was very demanding! I succeeded in tweaking by the time it was almost over. It seemed it was never easy and you all understood.

I discovered that I received more than the comfort and support I imagined from all you ex-strangers. You have all been very gracious, cheerful, friendly and helpful professionals while you face very seriously ill and not so seriously sick patients. It is draining. I want you to know that I know that, and still you carry this weight with your warm heart and acute mind.

So. Thank You All! Enjoy your lunch.

Love,

Cora Stanly
